

About the **tru**textile range

Our brand name comes from the English word 'true', which means; real, genuine, faithful, loyal, accurate and in alignment. **tru** represents the very best you can get in quality, service, delivery and performance.

We have listened to your requirements, so **tru**textile aligns perfectly to your needs.

About Tullis Russell Coaters

Tullis Russell Coaters is a leading UK independent coating and converting company and is part of the Tullis Russell Group. Together we have been specialists in the papermaking and paper coating industry for nearly two centuries.

Our extensive product range includes ceramic and textile transfer papers, security papers and a speciality resource for developing solutions for any challenges customers have for us.

We pride ourselves in our excellent customer service and have customers in over 120 countries throughout the world.

Further Information

For each of our papers:

Texitran CP

Texitran HS

Texitran ECO

we have produced a leaflet which gives you further information and all the technical and ordering information you need.

We have also published some simple guides on getting the most from our **tru**textile range of papers:

- Better printing – how to transfer print effectively
- Inks, additives and adhesives – the best ones to use
- Troubleshooting – what to do if you have any problems while printing.

Texitran CP

A **tru**textile paper from Tullis Russell

Texitran CP

Is part of the **tru**textile range of textile transfer papers from Tullis Russell Coaters.

What is it for?

Texitran CP is a specialist paper for high quality decoration – even photographic is possible.

Designed to cold peel, it is a specialist offset litho printing paper for use with textile offset inks. It can also be used for screen printing with plastisol inks, with or without powdered adhesives.

It is ideal for t-shirts and sweat shirts, but can also be used to print transfers for speciality fabrics such as workwear and sportswear etc.

Features

- A specialist offset litho printing paper
- Can also be used as a screen printing paper
- Compatible with specialist offset inks, plastisol inks and powdered adhesives
- Excellent dimensional stability and lie flat properties
- Coated on both sides and precision sheeted
- 100% cold peel release, no pinholes
- Formaldehyde free

Benefits

- Reduced waste
- Superior colour reproduction and image quality
- Good curl resistance
- Good consistency of shape, stability and smoothness
- Minimum ink set-off
- Ease of release
- Blister free after exposure to high humidity

Compatible inks

Plastisol, traditional backers, puff, fluorescent, glitter, offset litho 4 colour inks and powdered adhesives: Polyester, polyamide, polyurethane.
